

### Certified Network Cable Installer CNCI®

Following a review of the course content and sending one of our employees on the course we are more than happy to endorse the CNCI® course as part of the qualification process for becoming an Excel Cabling Partner.

Rather than expecting new engineers and applicants to sit the full Excel Installer Course in the future on passing the CNCI® test we will only require them to sit the online Excel Certification course and assessment, which covers specific Excel Products and Installation Guidelines, we are very comfortable that they will gain a first rate introduction to the industry from the CNet CNCI® Course.
