Certified Network Cable Installer Programme (CNCI)

Dear Mr Hawkins

R&M recognises the importance for skilled network technology and structured cabling professionals within the industry and seeks to achieve this through our own Qualified Partner Program (QPP).

This training is modular in both theory and practical to give the attendees an all-round appreciation of our products and best installation practises in accordance with the standards.

With the above in mind R&M are pleased to endorse the Certified Network Cable Installer programme (CNCI) as a suitable prerequisite to attaining the R&M QPP status.

Further details of the R&M QPP can be found at www.rdm.com or please email training@rdm.com

Yours sincerely,

Andrew Sedman
