Install & Test

CNCI®

Certified Network
Cable Installer
10 Days

iDaC Solutions are the exclusive supplier of Datwyler Cabling Solutions products and services in the UK and Ireland. The standard practice to become a Datwyler installation partner in this region would be to undertake a Datwyler training course, carried out by iDaC Solutions. This course includes a significant amount of 'generic' cabling standards and installation guidelines, therefore it is possible to become a Datwyler installation partner by attending the CNCI® (Certified Network Cable Installer), carried out by CNet Training, and a much shorter iDaCS overview (see below)

The CNCI® level 3 course reflects the ability to identify and use relevant understanding, methods and skills to complete tasks and address problems that, while well defined, have a measure of complexity. It includes taking responsibility for initiating and completing tasks and procedures as well as exercising autonomy and judgement within limited parameters. It also reflects awareness of different perspectives or approaches within an area of study or work.

The CNCI® level 3 course makes up 95% of the Datwyler accreditation
The remaining 5% needs to be given by iDaCS. This would take 2 hours and cover the following topics:

- Company Overview
- General Information about Datwyler / iDaCS
- Product portfolio (incl. Module, Cables, Panels etc.)
- Test Procedure and Warranty program
